

1  **LESSONS FROM NOAH**

Genesis 5 - 6

2  **Effects on the Earth**

How is the earth different as a result of the Flood?

3  **EVIDENCES**

-

- The Grand Canyon
- Extraordinary testimony of the Great Flood
- Compare with local floods

4  **Canyon Lake Gorge**5  **The Canyon Lake Gorge**

- Texas Set to Open New Canyon to Public
The Associated Press Oct 5, 2007
By MICHELLE ROBERTS
- CANYON LAKE, Texas (AP) — The formation of canyons, done with the flow of water over rock and time, is generally a practice in patience. But not here.
- A torrent of water from a bloated Canyon Lake sliced open the earth, exposing rock formations, fossils and even dinosaur footprints in just three days. To protect Canyon Lake Gorge from vandals, it's been open only to researchers since the 2002 flood, but on Saturday, it opens to its first public tour.
- "It exposed these rocks so quickly and it dug so deeply, there wasn't a blade of grass or a layer of algae," said Bill Ward, a retired geology professor from the University of New Orleans who started cataloguing the gorge almost immediately after the flood.
- The gorge, which emerged where a nondescript valley covered in mesquite and oak trees once was, sits behind a spillway built as a safety valve for Canyon Lake, a popular recreation spot in the Texas Hill Country between San Antonio and Austin.

6 7 8 9  **The Grand Canyon**

- Canyon Lake Gorge cut 50 feet through solid rock in less than 3 days.
- At that rate the Grand Canyon would have been cut in 274 years IF there were no more water than what went over the spillway at Canyon Lake
- The massive lake of residual flood water that spilled over the mountains in northern Arizona would have carved the Grand Canyon much quicker.

10  **The Grand Canyon**

About 6000 feet deep.

Ground is at 3400 ft. above sea level where it enters the Canyon.

Ground is about 7000 to 9000 ft. above sea level at the deep part of the canyon.

How did the river run uphill 3500 vertical feet to get over the mountain and start cutting the Canyon?

GRAND CANYON

Monument to Catastrophe

Steven A. Austin

ESTIMATES THE EROSION OF THE TOTAL GRAND CANYON AT 1927 FLOOD RATE: 1300 YEARS – p. 89

13  **EVIDENCES**

-

- The Grand Canyon and like formations

- Fossils – quantity, status (i.e. clams)
- Oil and Coal Deposits
- Vapor Canopy? Genesis 1:6-7 (affect on age)
- How did anything or anyone survive?

14  **FAITH & OBEDIENCE**

- Hebrews 11:1, 7
- Had he seen rain? Genesis 2:5-6
- The work
 - Approx. 450' x 75' x 45' Gen. 6:14-16
 - Animals – gather, feed, clean up after :19-22
 - The preaching - II Peter 2:5
 - The ordeal - Genesis 7:6, 11; 8:13
 - 40 days & 40 nights
 - A full year in the ark

15  **THE LIKE FIGURE**

- I Peter 3:20-21
 - How did Christ preach to the imprisoned spirits?
 - THROUGH NOAH
 - IMPRISONED NOW NOT WHILE BEING PREACHED TO
 - How did water “save” Noah?
 - How does baptism save us?
- II Peter 3:3-13
